Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

CLAIMS 1-15 ARE PRESENTED FOR EXAMINATION

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to method for the prevention of cardiovascular events, diabetes or diabetic complications which comprise the administration of at least an inhibitor of the renin-angiotensin system and optionally together with an antihypertensive, a cholesterol lowering agent, a diuretic or aspirin.
- II. Claims 13-15, drawn to a combination product which comprises an inhibitor of the renin-angiotensin system and a cholesterol lowering agent.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II, to the extent only that present claim 6 reads administering both an inhibitor of the renin-angiotensin system and a cholesterol lowering agent are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the method could be practiced with a materially different product, such as appropriate diet and/or exercise.

In all other respects, the inventions of I and II are not related and are patentably distinct.

Art Unit: 1614

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Claims 1-12 are generic to a plurality of disclosed patentably distinct species comprising cardiovascular events, diabetes and diabetic complications. Applicant is required, should in the invention of Group I be elected, under 35 U.S.C. 121 to elect a single disclosed species of cardiovascular events, i.e., myocardial infarction, etc., diabetic complications or diabetes itself, even though this requirement is traversed. Also, should the election read on present claim 6, then applicants should additionally elect a single additional active agent selected from an antihypertensive, a cholesterol lowering agent, a diuretic or aspirin.

Should applicants traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1614

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Raymond J Henley III whose telephone number is 571-272-0575. The examiner can normally be reached on M-F, 8:30 am to 4:00 pm Eastern Time.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marianne Seidel can be reached on 571-272-0584. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
